To,  
The Principal,  
MESCOE, Pune

Subject: Request for sponsorship of Final Year Project.

Respected Sir,

I am contacting you, regarding the sponsorship proposal for our Final Year Project. Our project group (Group Number: 33), guided by Prof. P. M. Bagul, consists of the following students:

Rohit Tondare	71710586F
Rahulnarayan Iyer	71710500J
Aditya Undre	71710590D
Akanksha Patil	71710452E

We are building a Dynamic Traffic Light Control System to be deployed in Pune. The project focuses on controlling the flow of traffic with the help of modern technology, viz. Object Detection and Image recognition. The project will also help streamline the flow of traffic by introducing synchronization between adjacent intersections. By means of Object Detection, the system will also help Emergency Vehicles pass through without obstruction of traffic.

We have been in talks with the DCP of Pune Traffic, Mr. Pankaj Deshmukh regarding the installation of this project across different parts of the city and have received affirmative feedback and permissions.

As per the problem statement we will require a number of electronic components. The detailed list of the components required is attached with this letter. The budget required for the project is Rs. 29,000.00. We are requesting financial aid for the same. We will be submitting our project model to the college after the final evaluation of the semester.

Thanking You.

Yours Faithfully,

Rohit Tondare  
Rahulnarayan Iyer  
Aditya Undre  
Akanksha Patil
